## ADVISORY

### READ BEFORE USING YOUR NES

A very small portion of the population may experience epileptic seizures when viewing certain kinds of flashing lights or patterns that are commonly present in our daily environment. These persons may experience seizures while watching some kinds of television pictures or playing certain video games. Players who have not had any previous seizures may nonetheless have an undetected epileptic condition. We suggest that you consult your physician if you have an epileptic condition or if you experience any of the following symptoms while playing video games: altered vision, muscle twitching, other involuntary movements, loss of awareness of your surroundings, mental confusion and/or convulsions.

### WARNING: DO NOT USE WITH FRONT OR REAR PROJECTION TV

Do not use a front or rear projection television with your Nintendo Entertainment System® ("NES") and this video game. Your projection television screen may be permanently damaged if video games with stationary scenes or patterns are played on your projection television. Similar damage may occur if you place a video game in a holder or pause it if you use your projection television with this video game. Neither Namco Home Software, Inc. nor Nintendo of America, Inc. will be liable for any damage. This situation is not caused by a defect in the NES or this game; other fixed or repetitive images may cause similar damage to a projection television. Please contact your TV manufacturer for further information.

## SORTIE OPTIONS

LIBYA 1986  
H2/H3 ZONE  
IRAQ-KUWAIT BORDER  
KARBALA REGION  
BASRA REGION  
SOUTHERN KUWAIT  
BAGHDAD REGION

These are the Sortie Areas you can choose from. The sorties at the top of the list are much easier than the ones at the bottom. The Libyan air defenses are nothing compared to what you'll find over Baghdad!

THE LATER SORTIES  
ARE TOUGHER...

BUT THAT'S WHERE  
YOU EARN THE  
HIGHER MEDALS!

## LIBYA 1986

In retaliation for Libyan-sponsored terrorist attacks on American citizens, on April 15, 1986 U.S. Air Force and Navy jets attack military targets inside Libya, including Col. Khadaffi's command center at Tripoli. Expect light defenses.

## H2/H3 ZONE

You'll be taking off from CV America in the Red Sea and flying over Saudi territory to reach western Iraq. Your targets include hardened Scud missile launch sites and mobile Scud launchers. You will be provided with last known locations of the mobile launchers, but you may have to search the area to find them.

## IRAQ-KUWAIT BORDER

Iraq's elite Republican Guard units are massed along the northern border of Kuwait. You are to eliminate their concentrations of armor.

Expect to encounter Iraqi Air Force fighters!

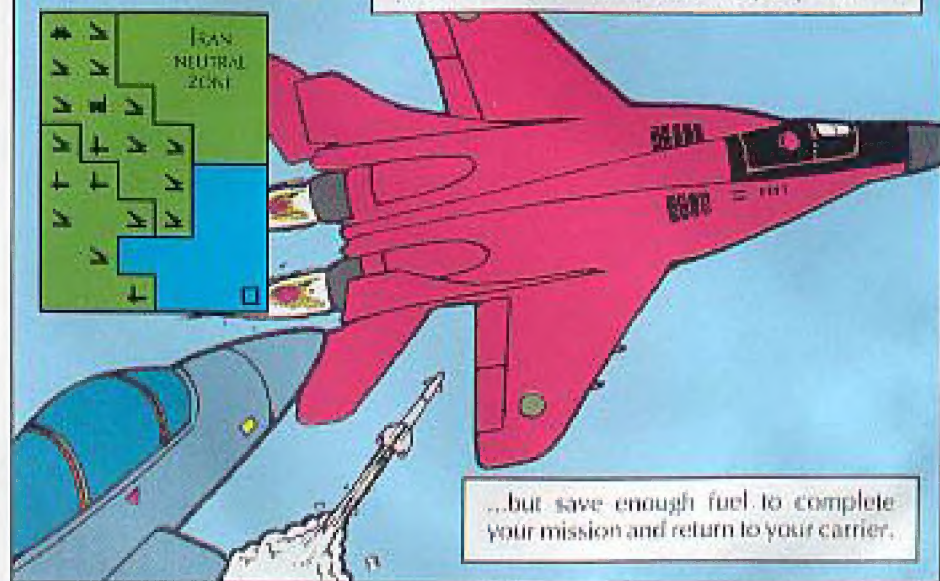

## KARBALA REGION

Military targets in the Karbala region south of Baghdad include the Salman Pak chemical weapons factory and the munitions plant at Iskandariya. You should also target the bridges over the Euphrates in order to cut the supply lines between Baghdad and the Kuwaiti battle front.

## BASRA REGION

Iraqi warplanes fleeing to Iran may turn to attack you in this region. Take out as many as you can...

...but save enough fuel to complete your mission and return to your carrier.

## SOUTHERN KUWAIT REGION

Your targets in the Southern Kuwait Sortie Area are mainly command bunkers and armor concentrations. You will also have to destroy an oil refinery in order to stop the flow of oil the Iraqis are dumping into the Persian Gulf.

You'll have to hit the refinery exactly — this could take more than one attack run!

## BAGHDAD REGION

ONLY HERE CAN  
YOU WIN THE  
MEDAL OF  
HONOR!

But expect a lot of SAMs and flak over Baghdad! The Iraqis will throw everything they have at you. Saddam's nuclear weapons plant has got to go!

**LANDING CONTROL:** Use your control pad to steer the plane - try to keep the landing brackets centered on the crosshairs. Your throttle will automatically decrease.

## MISSION OVER: DEBRIEFING
